### The top product for active and safety-conscious drivers.

With its new NIGHT BREAKER™ family of lamps, OSRAM is breaking records for the power and colour of headlights. Compared with standard lamps, they shine up to 90 % more light on the road and produce 10 % whiter light. Their maximum performance make NIGHT BREAKER™ lamps particularly attractive for active and safety-conscious drivers. Improved illumination of the road provides optimum visibility and therefore optimum safety. NIGHT BREAKER™ lamps also make driving more comfortable. Drivers find the whiter light stronger and more pleasant than ordinary light, which is of great benefit on long journeys.
